SMART LAND MANAGEMENT

FOR EXPLORATION AND MINING COMPANIES

maxgeo

Mineral and petroleum titles are the core assets of your company. Non-compliance is not an option and with government policy being an ever-changing landscape, flexible solutions are required to ensure risks are managed at an acceptable level.

No matter where in the world you conduct your business, or where your titles are located, or what complexities you face due to non-standard tenure, complex agreements or transitioning external forces, LeaseControl will capture all of this with simplicity and provide peace of mind.

Land Management Software

LeaseControl is a comprehensive land management application specifically designed for mining and exploration tenure and agreement management.

The flexible database structure allows for easy configuration of business workflows, as well as actions for single or multiple jurisdictions.

The application offers a quick and easy method of capturing and tracking all lease and agreement details and reporting. It enables you to view reporting and expenditure requirements with associated inbuilt automatic warnings.

LeaseControl can be integrated with geological, environmental and financial data making statutory reporting cost and time efficient.

FEATURES

- Configurable to business workflow for tenure management.
- Intuitive, user friendly menus and functions.
- Tracking, reporting and alerts for administration of tenure.
- Manage single or multiple jurisdictions, local or global, from a central point.
- Single, consistent view of tenement and agreement status.
- Business flow actions configured for tenure and agreement requirements.
- Action list of due dates and anniversaries.
- Configurable task automation and alert escalation.
- Inbuilt reporting and query builder with output to Word, Excel, csv, pdf.
- Integrate with systems such as Google, GIS and financial packages.
- Tiered security.
- Simple export and import function for tenure information.
- Ability to link documents.
- Comprehensive audit tracking capabilities.

BENEFITS

Lease Management Made Easy

The Lease Module enables the storage and tracking of all tenement related information required to effectively and efficiently manage land assets. The reminder system can be configured to handle multiple jurisdictions making LeaseControl a global solution.

- Tracking expenditure, rents and rates.
- Reminder system to maintain statutory compliance.
- Customise to suit your lease management processes.
- Track group reporting requirements.

Track your agreements

The Agreements Module stores and manages key agreement information. Easily retrieve the details on parties involved, contact details, tasks to be performed and digital documents without the need to access multiple sources.
