

maxgeo's digital logging application, LogChief, brings together the data capture strategy for mining and/or exploration businesses into a single platform. Adding value to your company's most important asset...data.

Data Capture for Tablet or Laptop

LogChief is a "ready to use" or customisable data capture application.

It is designed to simplify data collection and management of all data associated with mining and exploration.

LogChief achieves this by utilising database defined defaults, constraints and libraries to enforce data integrity at the point of data capture.

Collected data is directly synchronised or saved to file for download into your master database.

- **Industry standard logging templates**
- **Configurable data capture profiles**
- **Data validated according to business rules defined under administrator control**
- **Data automatically synchronised with your database**
- **Seamless integration to the Maxgeo Data Schema**
- **Backed by maxgeo expertise and support network**

FEATURES

- Fast, visual logging of geology
- Data validation at point of entry
- Inbuilt and/or customised forms to capture all datasets
- Inbuilt and/or customised validation rules
- Inbuilt and/or customised Striplog
- Sample dispatch
- Synchronisation logged data to your database
- Output data in various formats
- Built-in or customised reports
- Easy to configure
- Application can be used online and offline
- MxAPPS – inbuilt application with LogChief
 - CoreShed – store and manage core photography
 - Look - GIS inbuilt GIS tool
 - pXRF – seamlessly integrate with other datasets

BENEFITS

USER FRIENDLY SOFTWARE

LogChief is designed and developed by geoscientists and IT professionals, to provide administrators and end users with an easy to use digital data management system that maintains high end functionality.

AFFORDABLE

LogChief is an affordable application that is quick to implement and easy to learn, resulting in reduced overall costs.

SEAMLESS INTEGRATION

LogChief can seamlessly integrate with a variety of mining, exploration, GIS and third party applications.

INDUSTRY STANDARD

LogChief is a global industry standard for the exploration and mining industry.

FLEXIBLE

LogChief provides a flexible environment that can be customised to meet a client's business requirements ... no two logging forms are the same.

REDUCE RISK

LogChief improves accuracy and quality of data at the point of capture.
