

Administrator Course

Length - 1 Day

About the Course

The LeaseControl Administrator Course is for users who will be responsible for the company or site title or contracts administration. Participants will be shown how to manage their data using LeaseControl, as well as being shown detailed processes for entering, reporting, importing and exporting all title and agreement related data.

At the completion of this course participants should be able to:

- Create new title and agreement entries
- Customise reporting to jurisdiction and business requirements
- Produce reports via templates and query builder
- Update library values as required
- Configure compliance requirement for title and agreements
- Create email alerts on required actions
- Have an understanding of the administration of the LeaseControl database

Who should attend?

All general title and agreements administrators, environmental and legal managers. Those attending for the purposes of a refresher course should advise of time of booking

About our trainers

Our course leaders are selected from our team of highly skilled data consultants, which includes a tenement manager with titles, contracts and corporate experience relevant throughout the world.
