

Advanced Admin Course

Length - ½ Day

About the Course

The LeaseControl Advanced Admin Course is for users who have already undergone training, and require a top-up, or otherwise want to revisit the latest features in a supportive environment. Participants will receive a brief brush-up on the basics and thereafter concentrate on advanced functionality.

At the completion of this course participants should be able to:

- Create new compliance configurations
- Evaluate if current practice is best practice
- Make informed decisions regarding features and functions
- Understand how the needs of their relevant regions are incorporated into LeaseControl

Who should attend?

Trained users wanting to get up to speed on the latest version, have new regions to expand into or general want to improve their confidence and review how LeaseControl is being used in their business.

About our trainers

Our course leaders are selected from our team of highly skilled data consultants, which includes a tenement manager with titles, contracts and corporate experience relevant throughout the world.

Course Content

- Types of datasets and standard application
- Compliance configurations and library management
- System administration
- Importing data to, and extracting from, LeaseControl
- Modifying report templates for efficiency, accessibility and brand control
